

***Practice Manager at High St Dental Care in Melton Mowbray, Amanda Braithwaite, made contact in November 2010. She informed ServiceMaster of the urgent need for them to comply with the impending CQC regulations. Over the following year, the local ServiceMaster business worked with the practice developing the system to meet the CQCs requirements.***

As a leading supplier to the local Primary Care Trust, High Street Dental Practice were focused on meeting the standards in the shortest possible time frame.

The system developed with them has been implemented and has been operational since November 2011. High Street Dental Practice have not yet had an inspection but as the system is in place, all the training done and the checks documented and filed, they know that they are fully compliant and confident that any inspection in the future will be passed without problem thanks to the help of ServiceMaster.
